Connected Partner Program

CR-PRO V3

QRCG

ENCODE LABS

Features That Make a Difference:

- Generates Credentials based on the mailed QR code: easy distribution of Access tokens
- Secure your site perimeter more efficiently by limiting public access
- Provide access to car parks, perimeter gates, secured reception areas, etc.
- Implement fast-lane registration or VIP reserved parking – accessible only to selected visitors
- QR Credentials are only valid for a set period of time before and after the visit start and end time
- Supports printing compatible Visitor QR Codes through C•CURE ID Badge Layout on V2.90+
- Built-in troubleshooting window that checks the installation step by step, from the service to the C·CURE import

QR Credential Generator (QRCG)

for C·CURE 9000

The CR-PRO QR Credential Generator (QRCG) module for C·CURE 9000 is a service that automatically generates access credentials for visitors who receive a QR code via email. Visitors can then use this QR code as a credential at designated access points.

For example, QRCG can be used to grant entry or exit permissions to VIP parking areas, perimeter gates, or the main building reception, while keeping these zones securely closed to unregistered individuals.

This functionality enables you to maintain a secure and controlled site perimeter - restricting access through your Access Control system while still allowing pre-registered visitors to enter seamlessly with their emailed QR code.

The QRCG service simplifies access token distribution by converting each QR code into a valid digital access credential delivered directly via email.

System Requirements	
Supported Server OS	**Supported Version**
Windows Server 2025 Standard & Enterprise * Windows Server 2022 Standard & Enterprise Windows Server 2019 Standard & Enterprise Windows Server 2016 Standard & Enterprise**	64-bit 64-bit, minimum version 21H2 64-bit 64-bit, SP1 or higher
Supported OS	
Windows 11 Professional & Enterprise	64-bit, minimum version 24H2
Windows 10 Enterprise LTSC	64-bit, version 1809 or 21H2

*Only version 3.10 SP1 and above
** Only versions 2.90 and 3.00

C•CURE 9000 Requirements

- Supported C·CURE 9000 version (V2.60 -> V3.20)
- Visitor Management license option
- C·CURE 9000 Web Portal installed
